

MATLAB 代码

```
1 for i = 1:2:popSize % pairs counting
2     parent1 = parents(i+0,:); child1 = parent1;
3     parent2 = parents(i+1,:); child2 = parent2;
4     % chose two random points of cross-section
5     InsertPoints = sort(ceil(numberofcities*rand
6         (1,2)));
end
```
